

End to End Digital Transformation for... Food Safety Inspections & Regulatory Services

Abavus Webinar 19.09.2018

Introduction and welcome

Berni Simmons

Sales & Marketing Director

Agenda

- Introduction & recent background
- Overview of platform structure
- Demo of Digital Inspection Process
- Additional features of the Compliance Module
- Questions & Answer

Challenges to Regulatory Services

Resource intensive

Requires trained staff and often involves complex legislation

Lacking automation

Tend to be a more traditional approach in these service areas

Keeping customers satisfied

Customers expect immediate response and feedback

Maintain services on less resource

A requirement to maintain regulatory services with less resources

Challenges to innovation

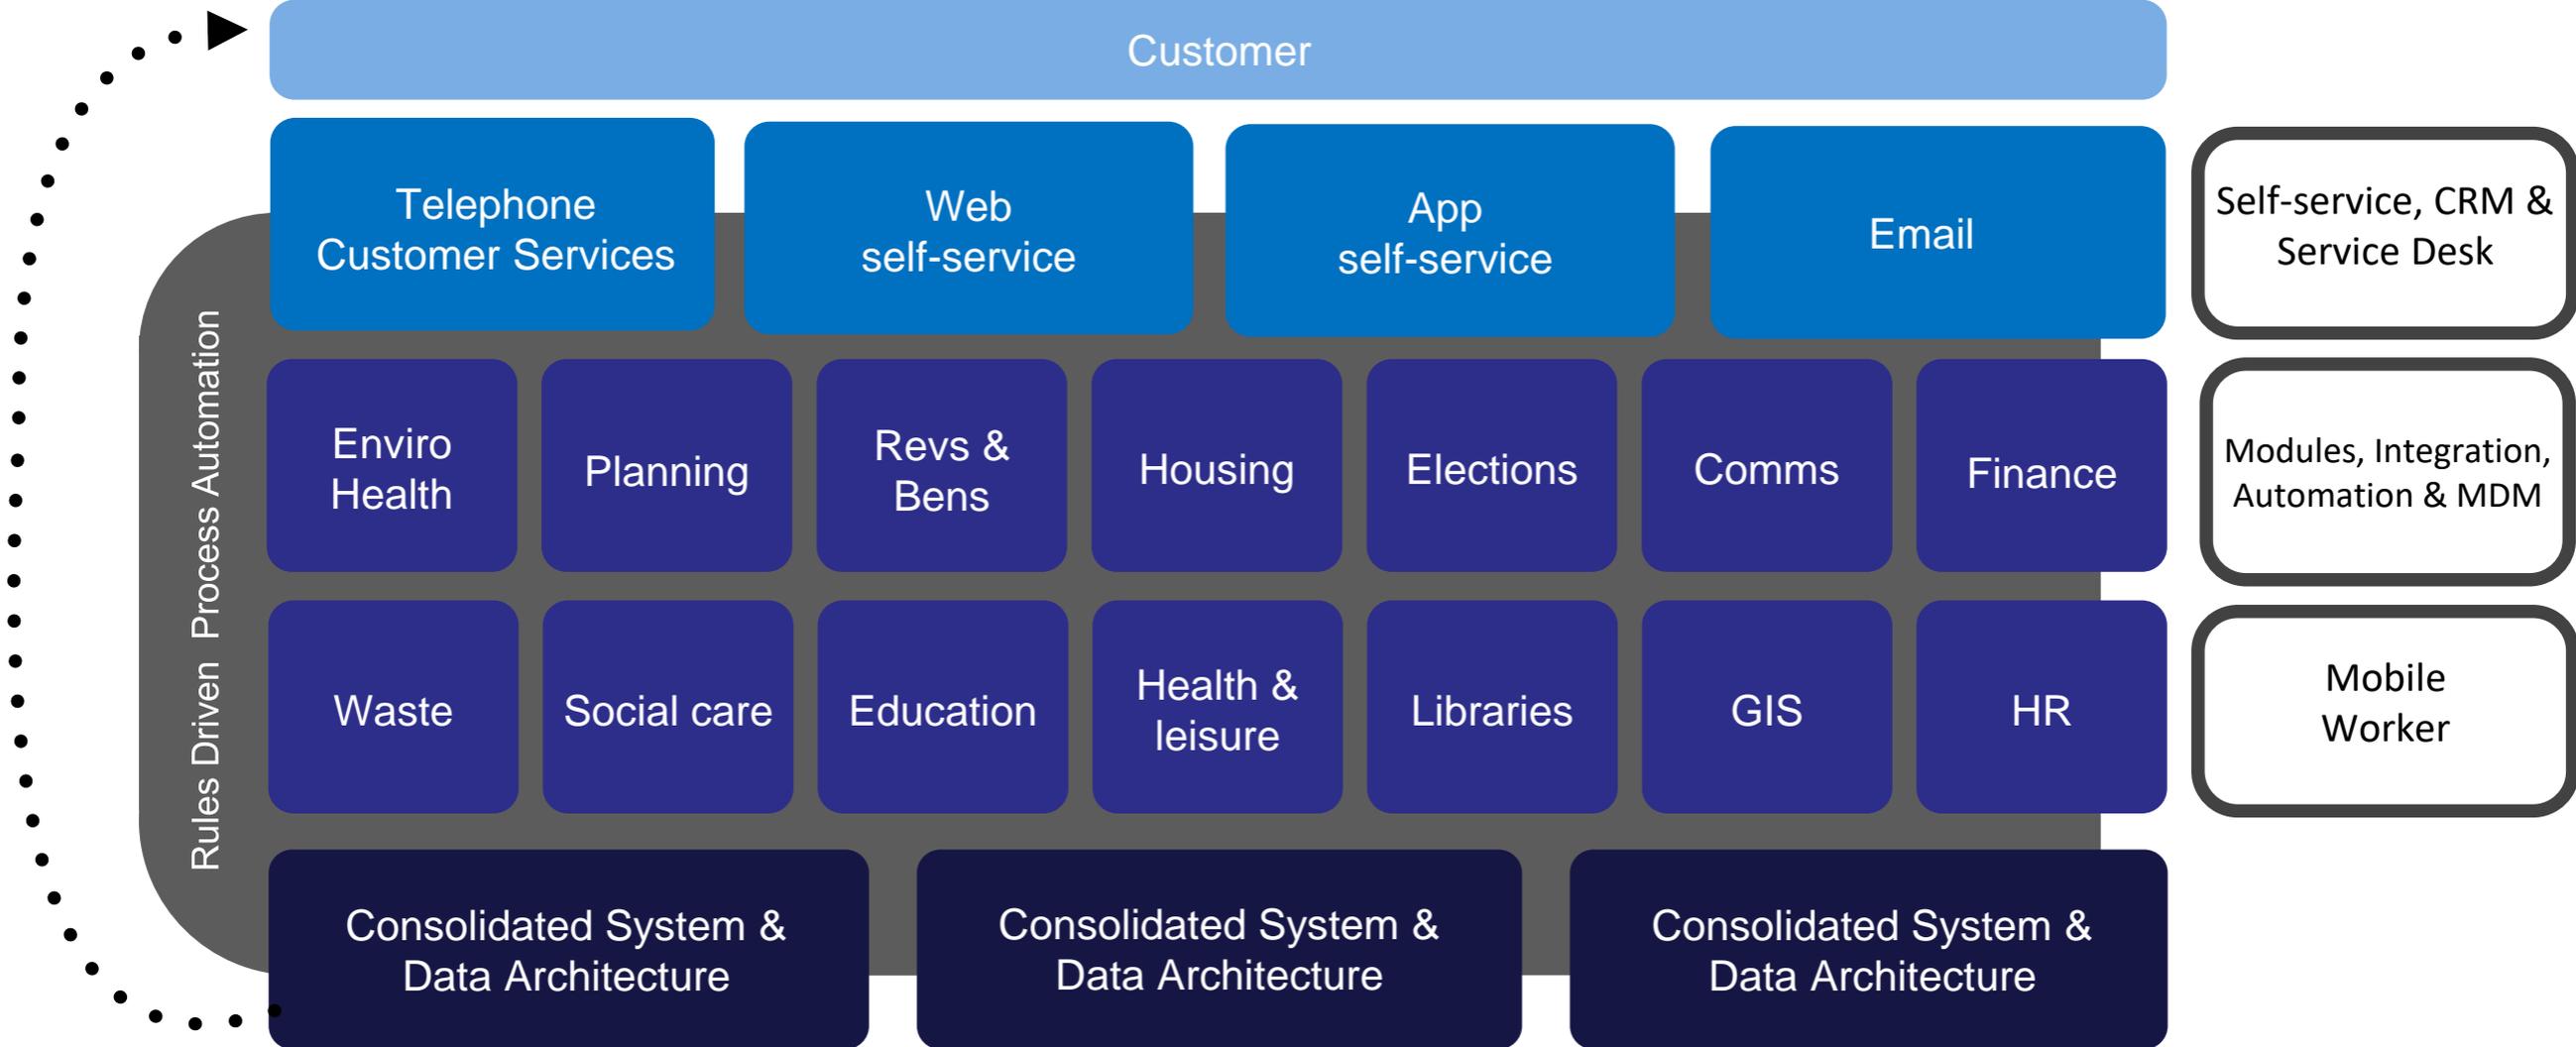

Budgetary constraint leads to a short term approach to regulatory management

Analytics & analysis

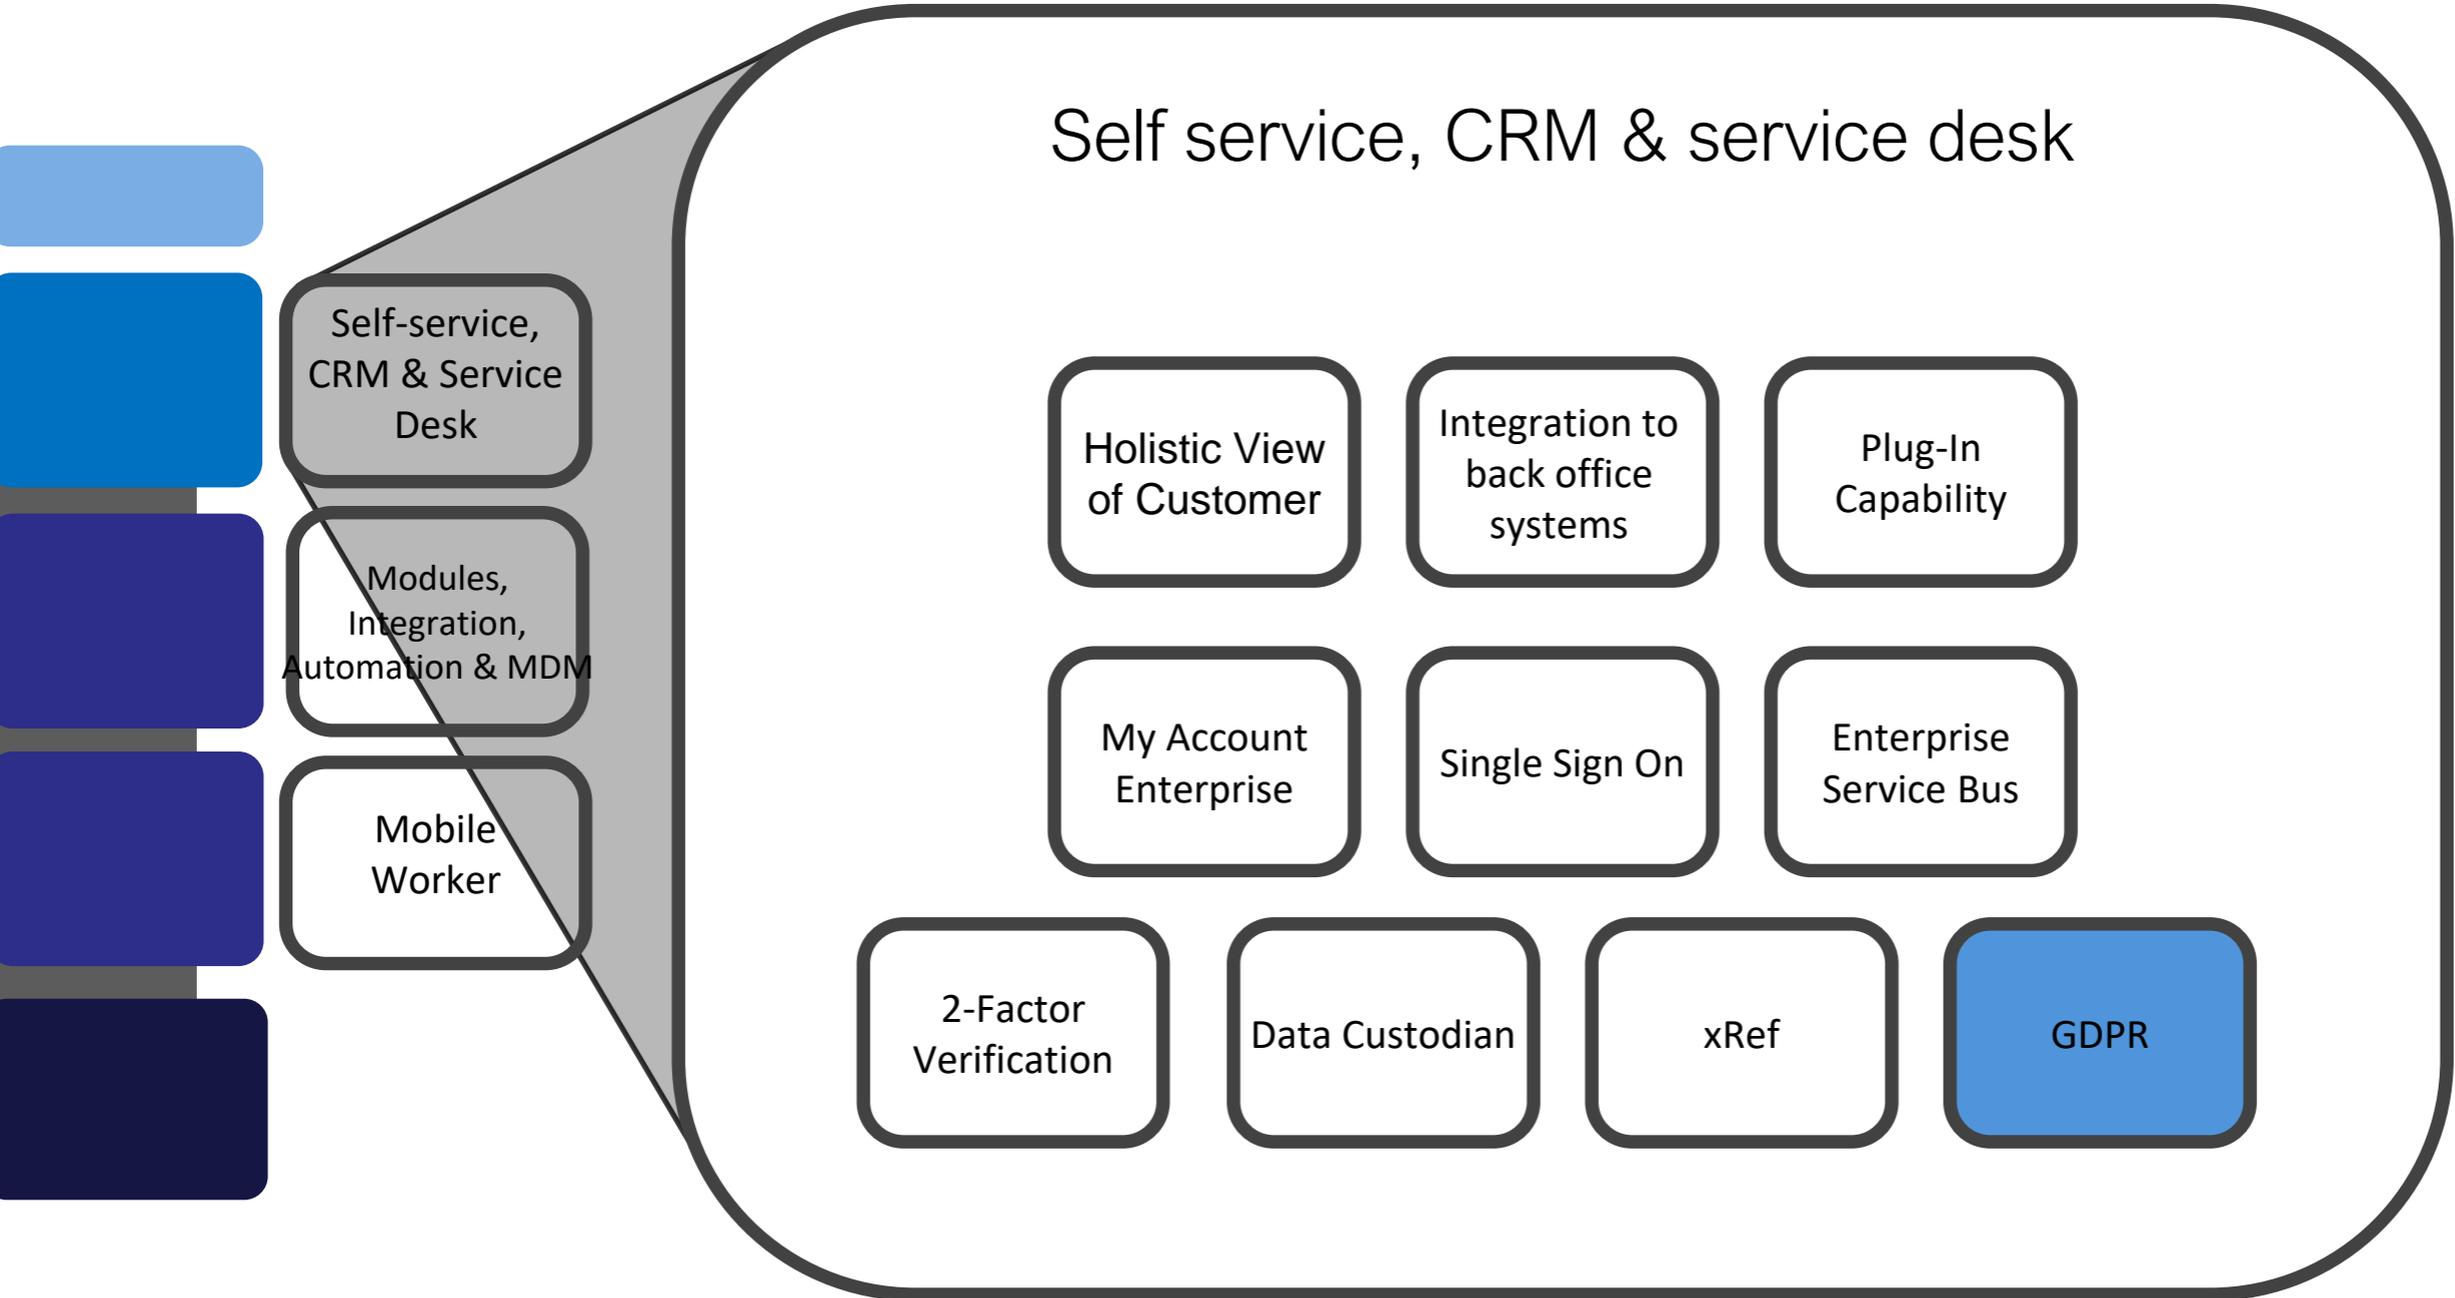

Ability to report on and analyse data as part of an integrated platform

My Council Services & Contemporary Local Government Structure

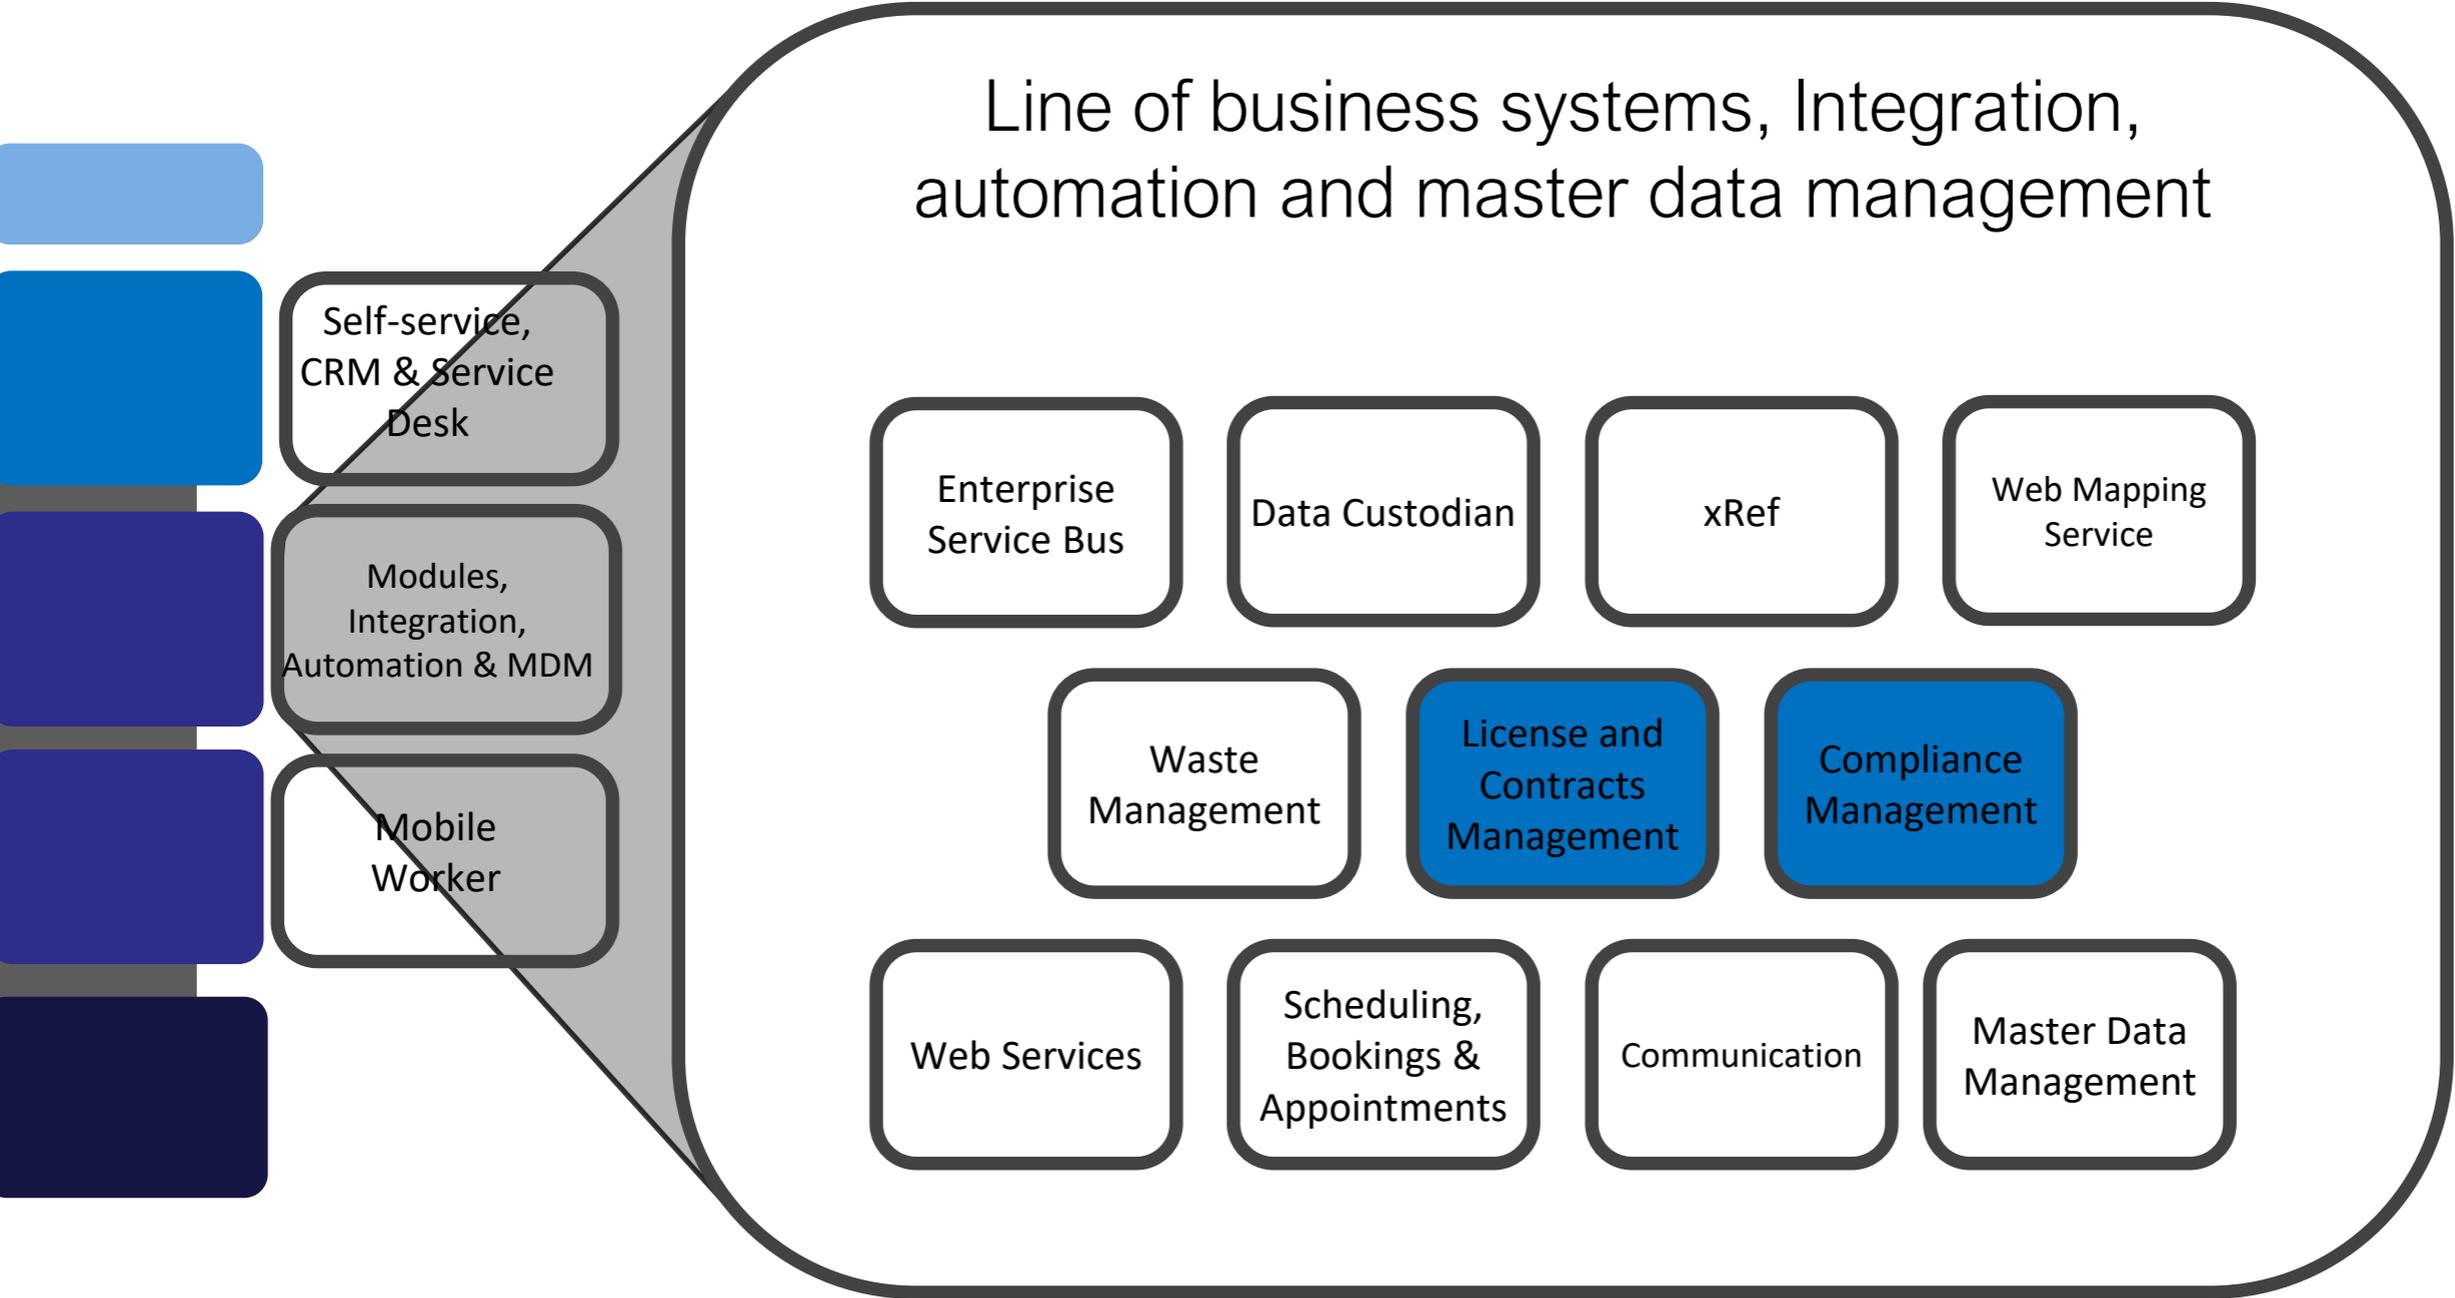

Extended Process Automation

Self service, CRM & service desk

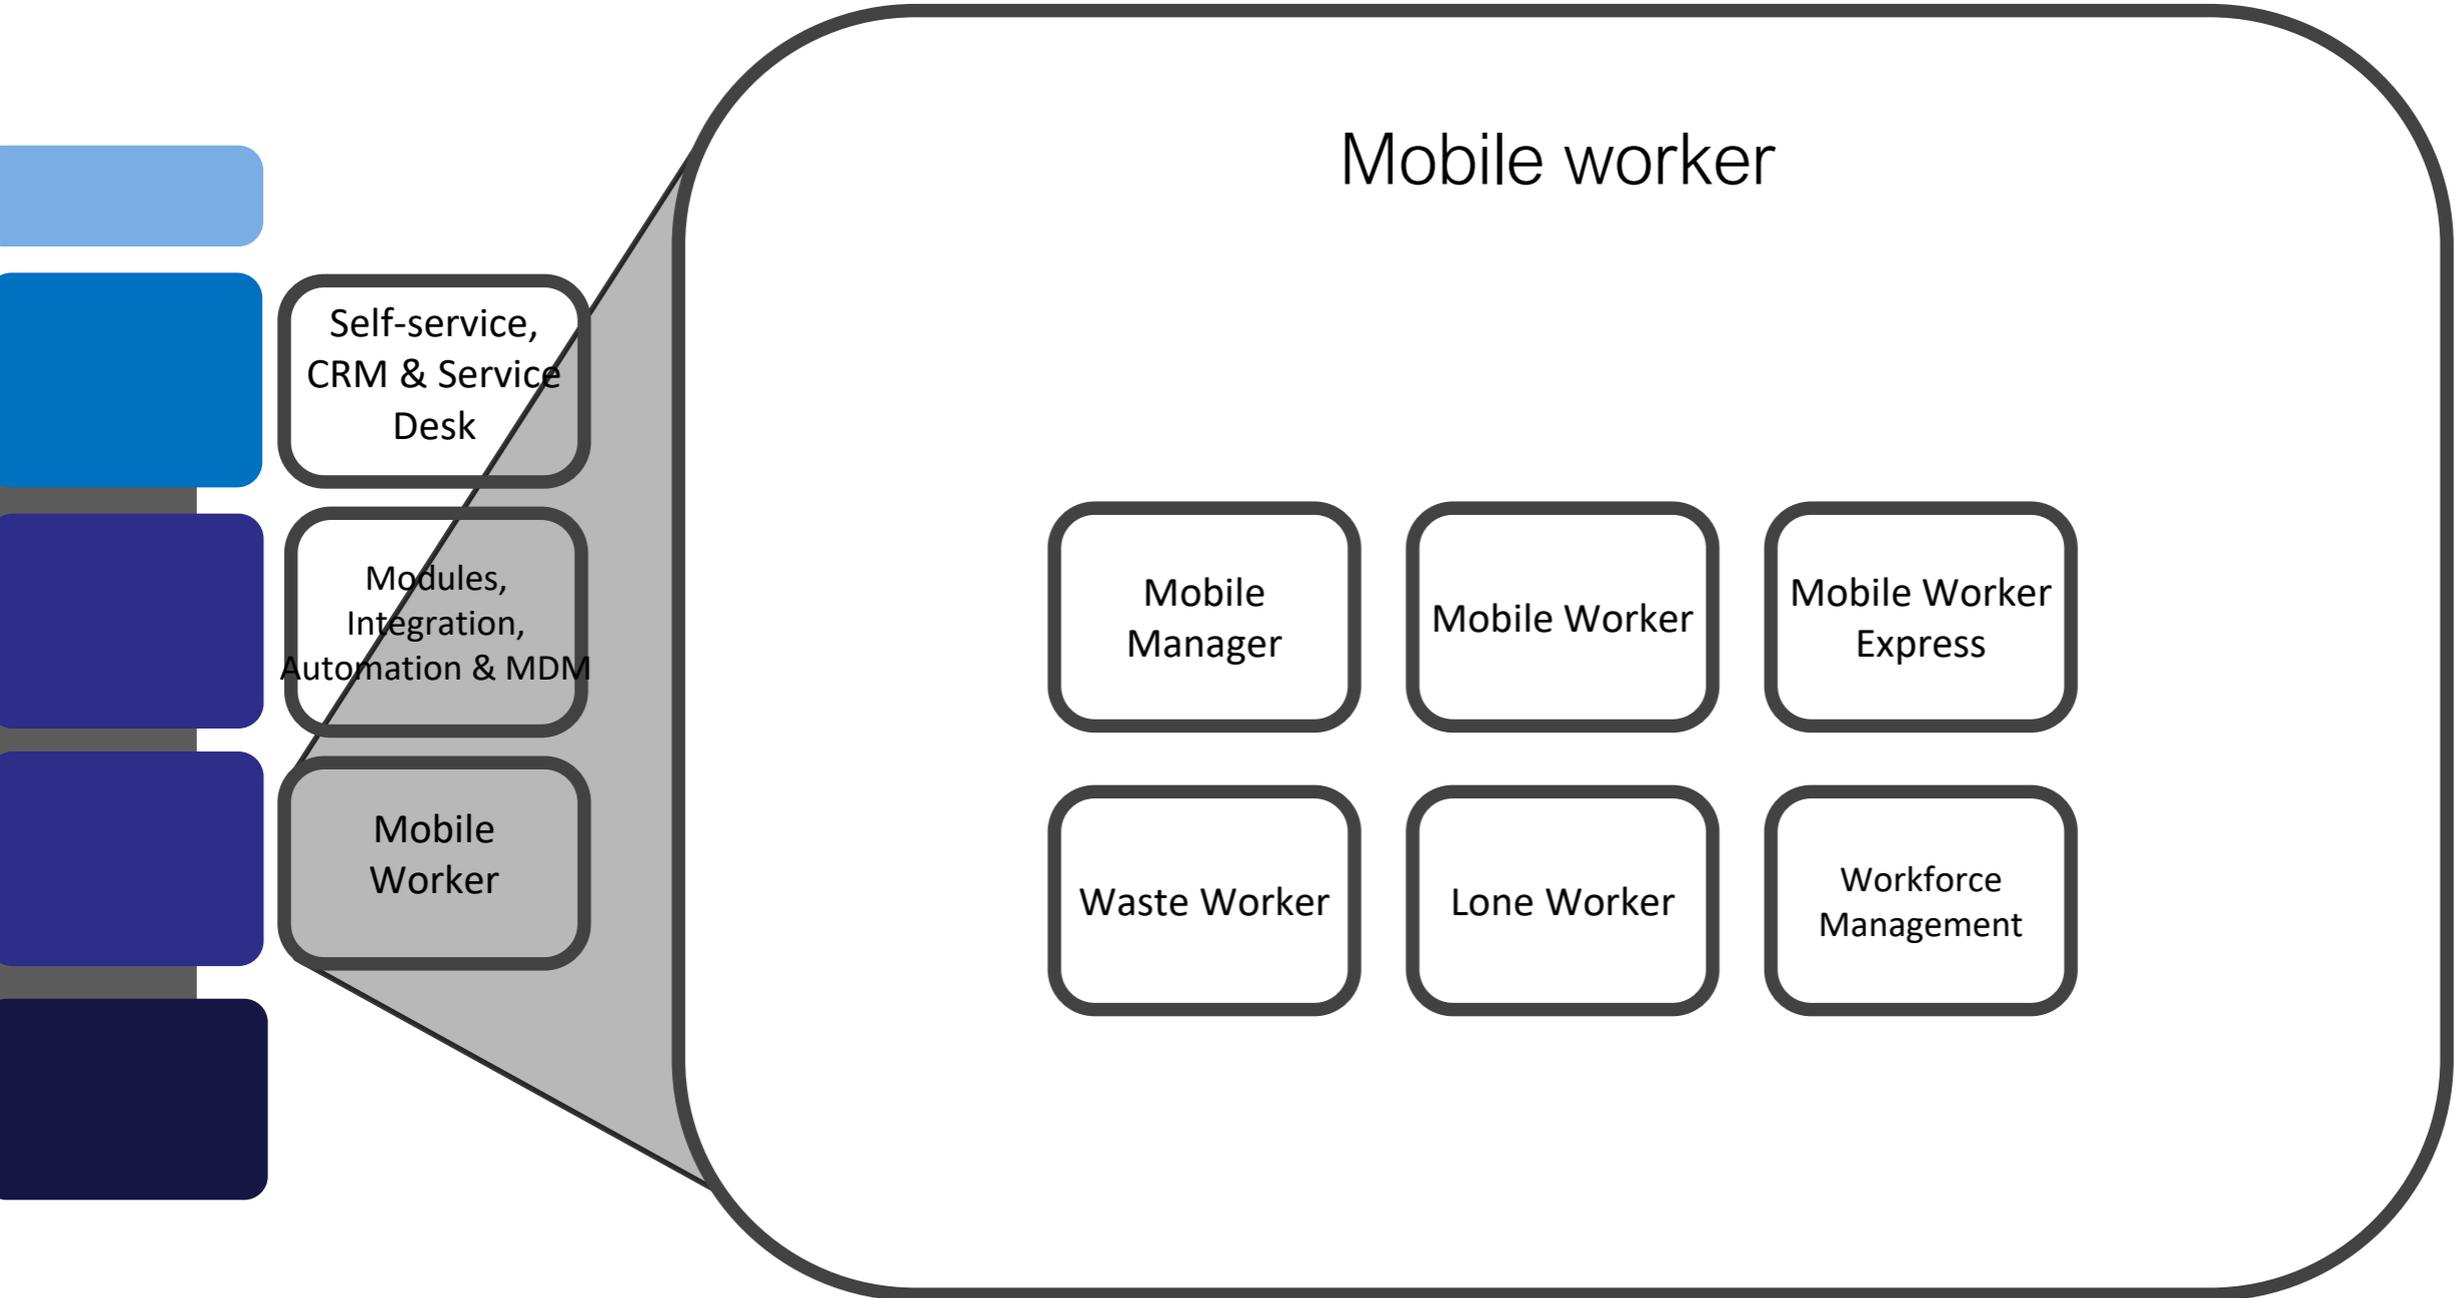

Extended Process Automation

Line of business systems, Integration, automation and master data management

Extended Process Automation

Mobile working

Our response to waste management transformation

Self service

Every service should be online with a focus to allow the customer to complete the end to end process themselves

Automation

Create rules that manage workflow and outcomes

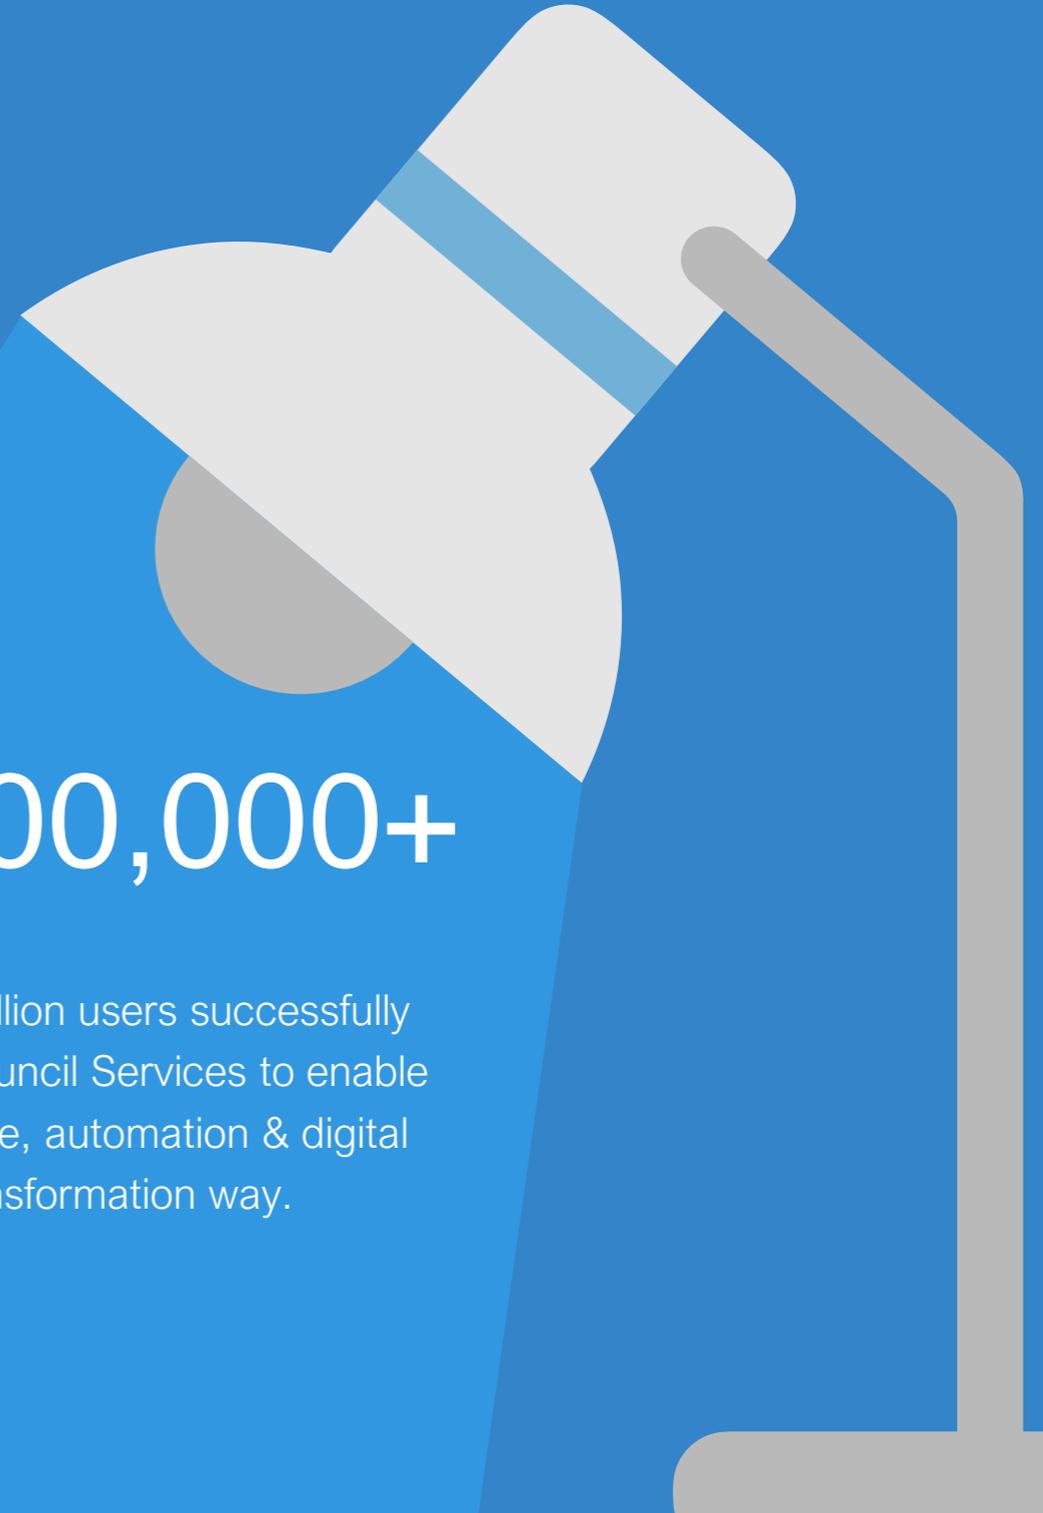

Cost effective

Reducing the financial burden on authorities to release resources into other depleted areas

Scalable

A module for every service area all on one platform

1,000,000+

Over 1 million users successfully use My Council Services to enable self service, automation & digital transformation way.

An end-to-end digital
process for all regulatory
services

Environmental Health

HEALTH AND
SAFETY AT WORK

Vehicle inspections, asset
inspections...

FOOD SAFETY
AND STANDARDS

End to end digital process
for food safety inspections

The process flow

Autogenerated tasks and end to end digital processes

Licensing Services

LICENSING OF PREMISES

Enable digital application for a premises licence

TAXI LICENSING

For business collection of waste. They can subscribe to collections for a year, and cancel when not required.

The process flow

Custom Forms, Risk Profiles & Scores

Service request and Case

- Forms builder**
Add or edit your categories, questions and answers
- Forms designer**
Design your forms, questions
- Rules**
Add or edit rules, that create the different attributes on a Case and Task
- Status**
Add or edit Service request
- Transitions**
View or update status transitions
- Priority**
Add or edit Service request

1 Design process forms in GUI Form Designer

Risk

- Set**
Define and manage risk sets
- Impact**
Define and manage risk impacts
- Probability**
Define and manage risk probabilities
- Band**
Define and manage risk bands

2 Configure risk profile for any compliance or score based process

3 Match risk / compliance profile to form question

Food & building Inspections * Category Food Inspection * Enabled Yes No

Non-Standardised risk score * Highest type Minimum score

Question
A (100)
Food type / handling method
Method of processing
Vulnerable groups
Current compliance structural
Risk of contamination
B (100)
Consumers at risk
Current compliance hygiene
Confidence in control systems

Demonstration

Further features

Communications

Remind customers of an appointment

Or

Automated follow up after an inspection

SMS

You can send SMS' to customers from the communications module, with merged fields from the customers profile or service request.

Email

You can send tailored email notifications to customers as part of scheduled activity or for one off events.

Push

If a customer has downloaded the app then you can send messages via the Push notification method.

Call

The platform has fully integrated telephony capability meaning you can schedule automated calls from a voice recording or text-to-speech.

Integration out of the box

Our platform allows Local Authorities to place the governance and configuration of the waste process in the hands of 'process experts'.

The screenshot displays a web application interface with three main configuration panels and two data tables.

Payment integration
Define your payment gateway to take card payments during form creation

Web service reference
Use Web Service References to access a Web service across the network.

Map overlay
Define map overlay, manage visibility and min/max zoom level for each layer.

Type	Name	URL	Enabled
REST	Collection day	http://dynamic.maidstone.gov.uk/getcollectiondays/Service1.asmx/getCollectionDays	Yes
REST	Sum	https://idbdemo.itouchvision.com/portal/itouchvision/ITVMycouncilServicesWS/doSum?input1=2&Input=10	Yes
REST	GMap	http://maps.google.com/maps/api/geocode/xml	Yes
Based on WSDL	sdsd	sdwsd	Yes

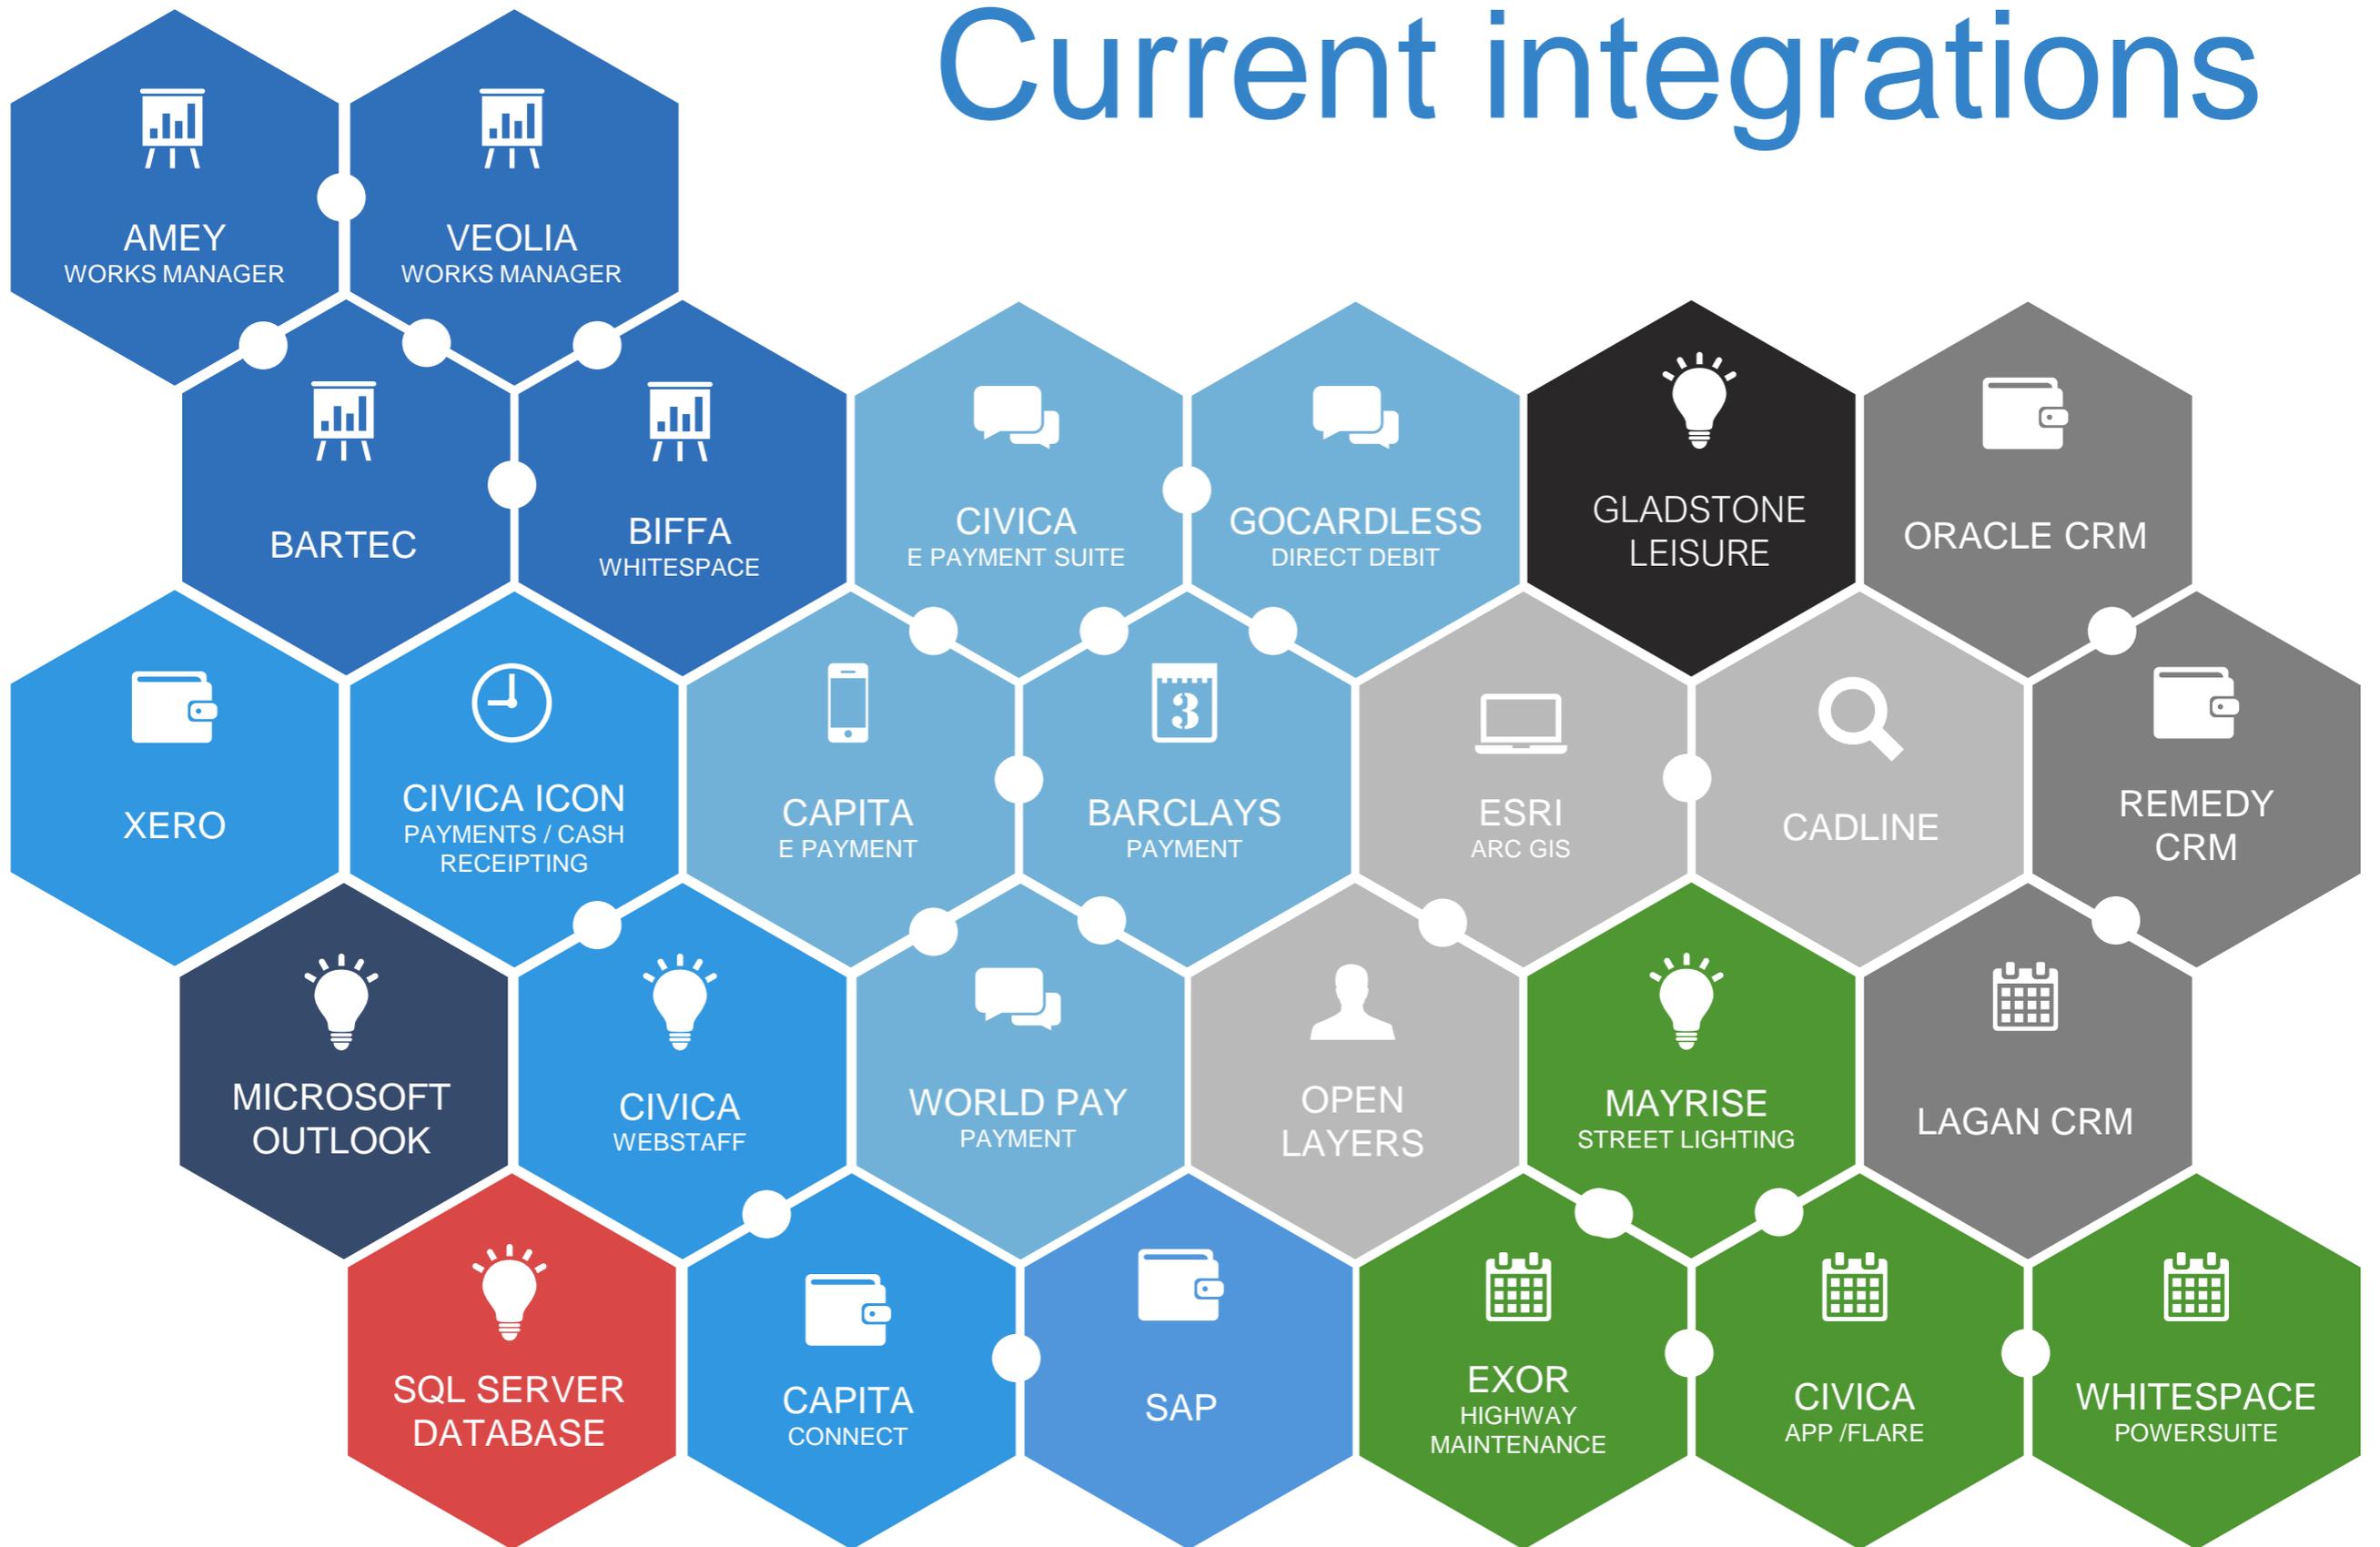

Payment gateways

Edit	Payment gateway	Description	Enabled
	CAPITA	Capita Payment Gateway	Yes
	CIVICA	CIVICA Payment Gateway	Yes
	worldpay	WorldPay Payment Gateway	Yes

1 - 3

Payment integrations and web service references, once created, are available for re-use as 'plug-in' components

Current integrations

- Council systems
- Payment gateways
- Waste management

- Health systems
- Finance systems
- Mail and calendar systems

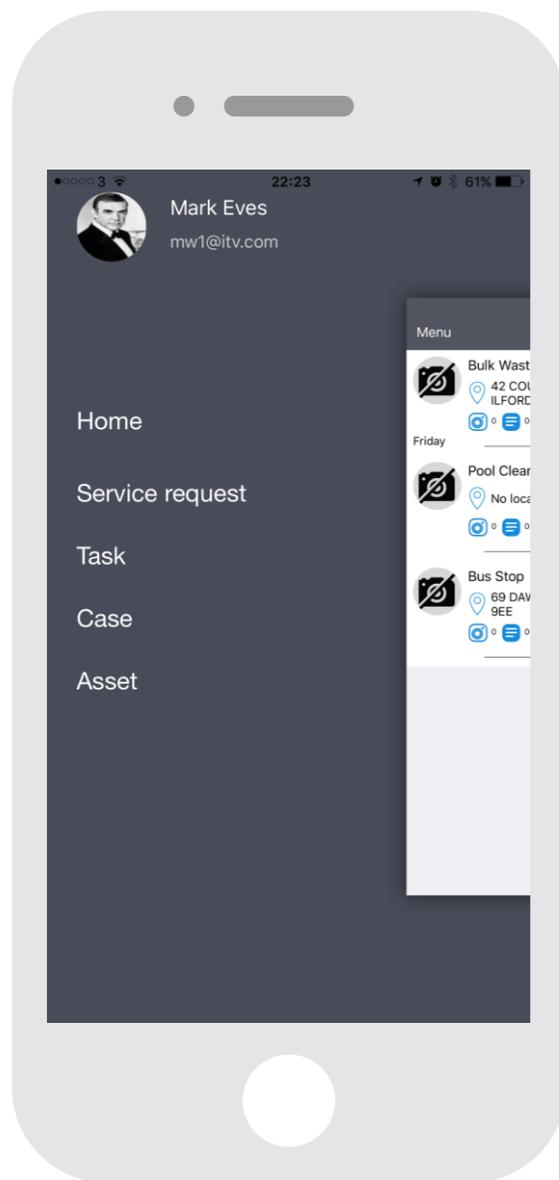

- CRM systems
- HR systems

- GIS systems
- Custom system

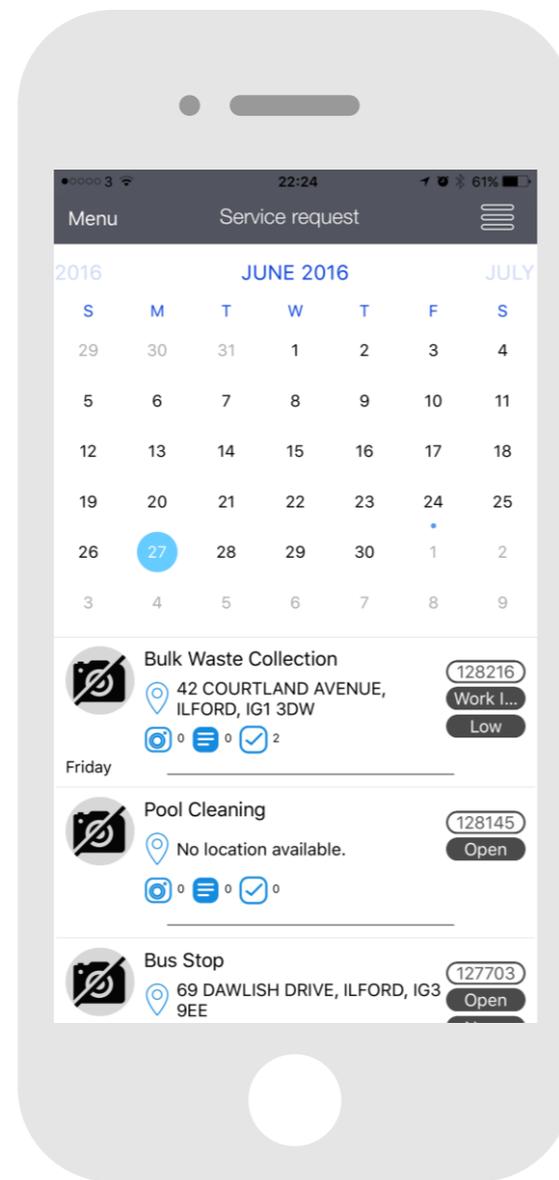

Mobile working for Regulatory Services

Mobile worker

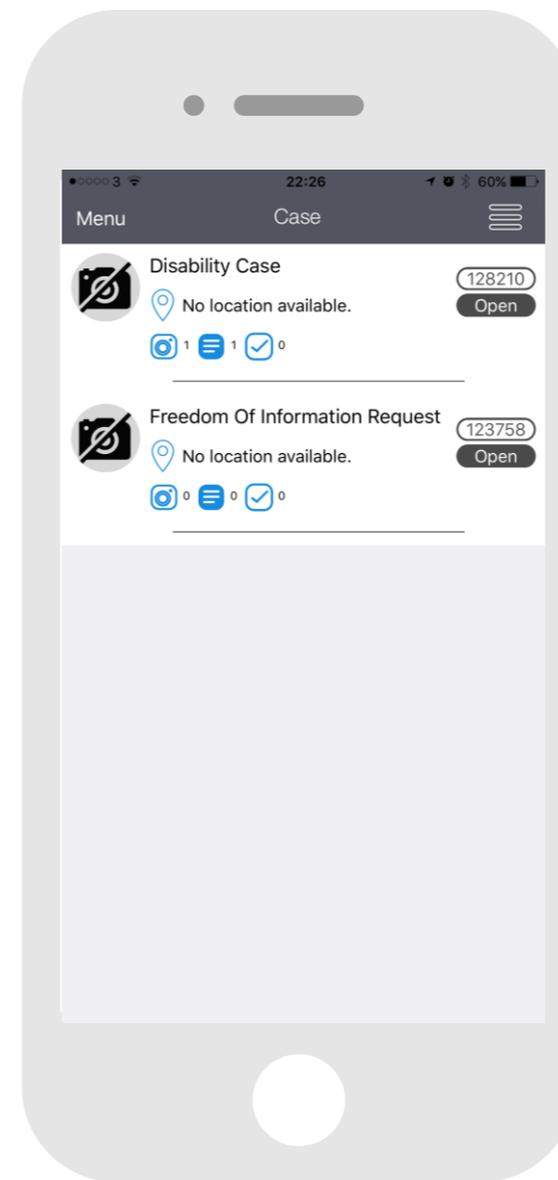

Mobile worker provides each worker with full access to the back office platform. There is no requirement to come into the office pickup work orders.

Details

Realtime navigation & route optimisations

Automatically assign tasks to people based on strict criteria.

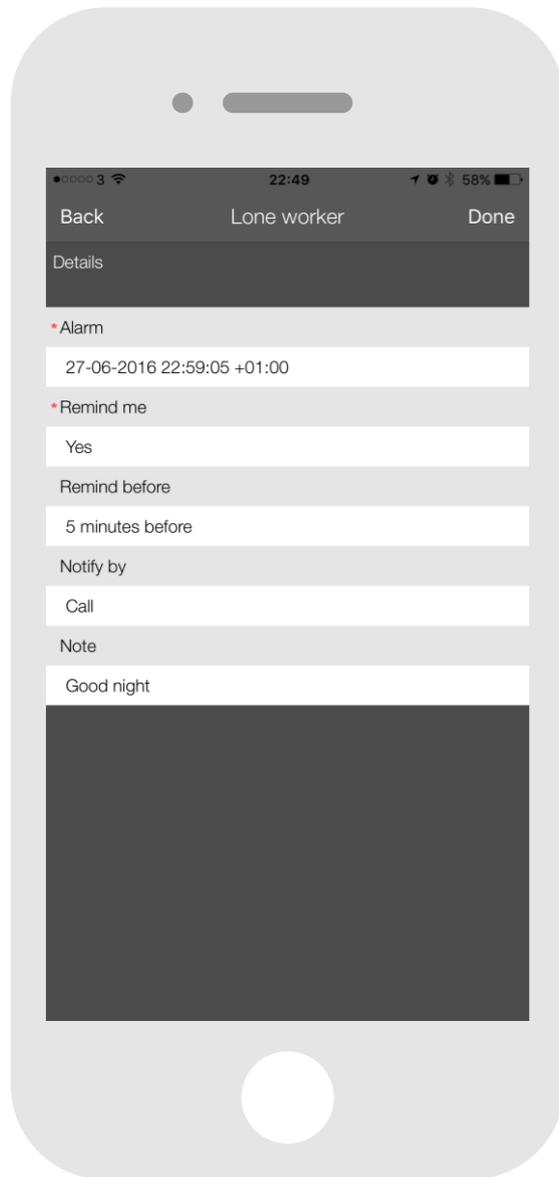

- Cheapest fuel - Fill up for the best price with real-time information about fuel prices.
- Real-time traffic - Traffic service, powered by TomTom Traffic with data collected from millions of drivers. Extremely accurate traffic information with faster route suggestions enables you to avoid every traffic jam.
- Commercial routing & route optimisation - multi-vehicle and multi-stop optimisation with various restrictions, vehicle attributes, such as vehicle type, availability, capacity, cost per km, cost per hour, maximum driving and working times, task attributes, e.g. compatible vehicles, volume, priority, pickup, and delivery service times and time windows.

Complex result-set, e.g. vehicles used, tasks and capacity served, total costs, working time, distance, and time driven, individual routes with details.

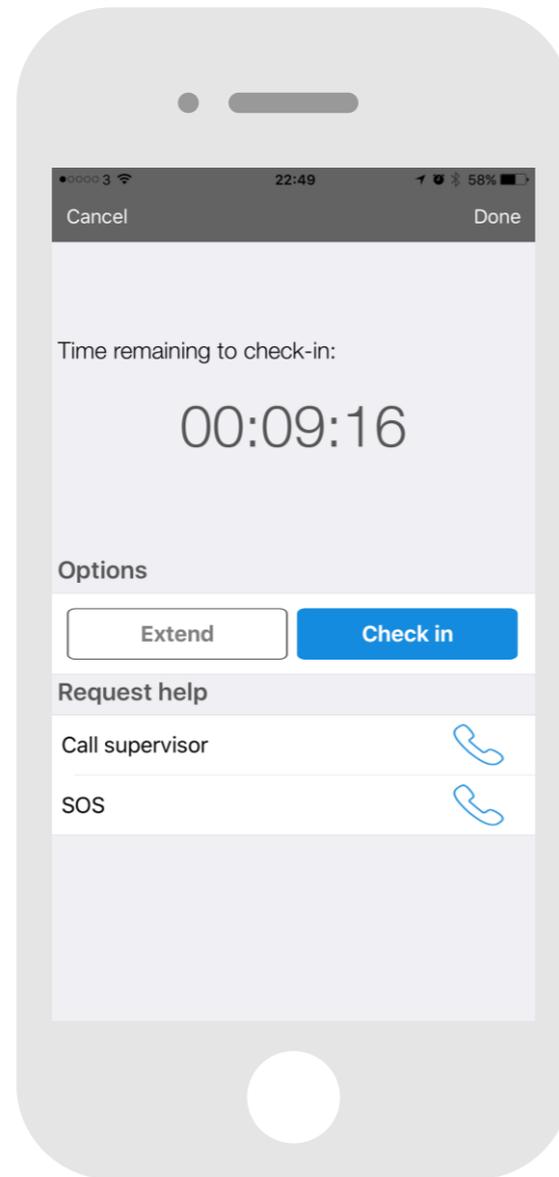

Lone worker

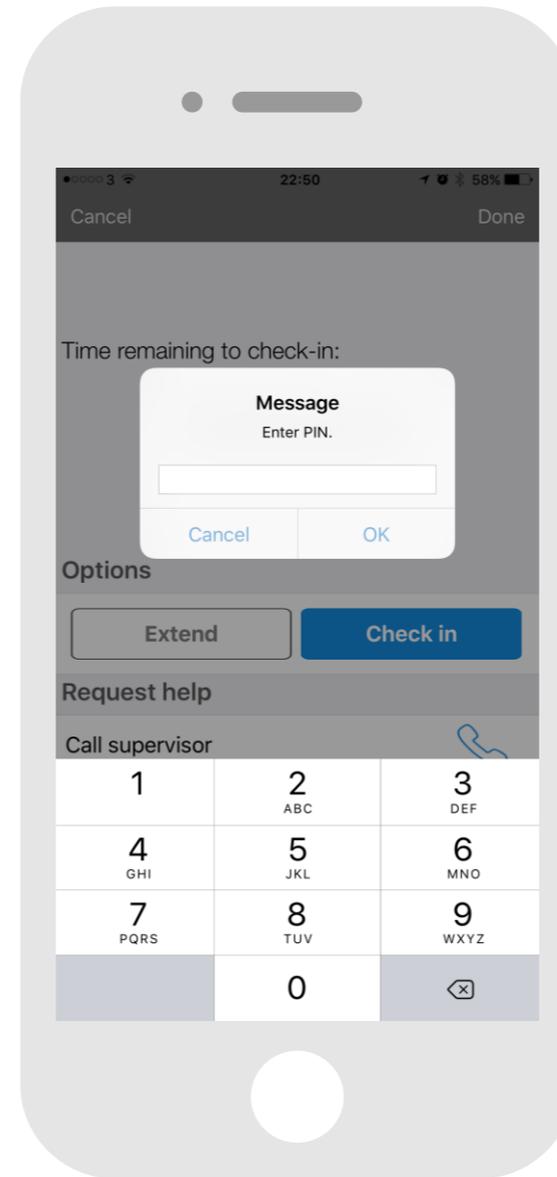

Integrated lone worker for all your workforce

Workforce Management

View your daily staff journeys

The screenshot displays a web-based interface for monitoring staff journeys. At the top, there are three tabs: "Monitor", "Visibility", and "Journey". Below the tabs, the "User" field is set to "Mark Eves (mw1@itv.com)". The "From date" is "09-FEB-2016 00:00" and the "To date" is "09-FEB-2016 23:59". A "Search" button is located to the right of the date fields. A checkbox for "Apple iPhone" is checked. The main area is a Google Map showing a red route starting at point 'A' near Watford and ending at point 'B' near Northampton. The route passes through St Albans, Luton, and Milton Keynes. The map includes various road labels (A, M) and place names. In the bottom right corner of the map, there are controls for a person icon, zoom in (+), zoom out (-), and a "Report a map error" link.

Workforce Management

Track all your workforce and view their current locations

The screenshot displays a workforce management application interface. On the left, a Google Map of the United Kingdom is shown, with a blue circle highlighting Birmingham and a red pin marking Northampton. The map includes major roads and city names. On the right, a vertical list of employee profiles is displayed, each with a circular profile picture, the employee's name, and their last update time.
